

Ship **Platform-Ready** Content Globally in Days, Not Weeks

AI compliance and editorial platform for global distribution. Analyze scenes, map to market regulations, generate edit plans, and deliver film-grade cuts.

WHAT IT IS

VIDCOMPLY AI is a **scene-understanding and policy engine** with film-grade editorial automation. It detects risks across video, audio, and on-screen text; aligns them to platform and regional rules; then generates an edit plan with **EDL/OTIO, masks, and audio cues** or renders finished versions. Privacy blurs (faces, plates, signs), localization-safe edits, and ad-suitability adjustments are built in. Human review is supported at every step.

WHO WE SERVE AND WHY THEY USE IT

Distributors and sales agents

Fewer redeliveries, faster first-pass acceptance across markets and platforms

Labs, localization, and QC vendors

Pre-QC at scale with timeline-ready edit packs and less subtitle re-work

Post houses and finishing teams

Save hours on repetitive blurs, mutes, and trims with reversible, artist-controllable edits

Enterprise brands and publishers

Automated policy checks and privacy edits, internal scorecards, and audit-ready reports

WHY NOW

5+
MARKETS

×

30+
PLATFORMS

∞
SHIFTING RULES

=

EXPONENTIAL
COMPLEXITY

Each destination expects policy review, local ratings, privacy and suitability adjustments, subtitles/CC alignment, and exact tech specs. **Late finds create resubmits, missed windows, and lost monetization.** Automating the detection and proposing minimal edits early saves cycles and protects release timelines.

HOW IT WORKS

1 Upload a master or connect your library. Select platforms and markets, choose an outcome preset (US broadcast, EU privacy, or maximize monetization).

2 Vision agents analyze scenes across video, audio, and OCR. Map findings to rules, propose minimal edits. **Review and approve per issue/scene before render.**

3 Receive compliance reports and editorial packs (EDL/OTIO, masks, audio cues) or rendered platform versions. Direct handoff to Resolve/Nuke or via API.

CAPABILITIES BY JOB TO BE DONE

Compliance intelligence

- Scene-level detection across violence, sex/nudity, minors, self-harm, drugs, weapons, hate, sensitive symbols, privacy and personal data, profanity, and on-screen text
- Mapping to platform and regional frameworks with rule references and confidence
- Rating and ad-suitability predictions with clear rationale

Editorial automation

- One-click apply of blur, mute, and cut on exact timecodes
- EDL/OTIO, masks, and audio cues for Resolve and Nuke; reversible, artist-editable results
- Scene exclude or replace workflows for sensitive shots

Privacy and localization

- Film-quality blurs for faces, number plates, signs, and screens; crowd de-identification
- Region-specific variants that keep subtitles and M&E in sync
- Timed-text conformance and checks for profanity, slurs, and cultural terms

Governance and integrations

- Role-based approvals, change logs, and signed acceptance reports
- REST API, webhooks, and storage connectors; handoff to IMF/Backlot-style workflows
- Tunable policies, whitelists/blacklists, consent lists, and human-review queues

Accuracy and tuning

- Thresholds and rules are tunable; confidence scores shown; human-in-the-loop for edge cases

What Goes In

REQUIRED

- **Master video** file or cloud storage link (ProRes/DNxHR mezzanines, H.264/H.265, IMF, SRT/VTT/TTML)
- **Target destinations:** platforms & markets
- **Outcome preset:** broadcast, privacy, or monetization

OPTIONAL

- Subtitles/CC files & transcripts
- Brand lists & consent metadata
- Custom house style rules

What You Get

REPORTS & DOCUMENTATION

- **Compliance reports** (PDF/CSV/JSON)
- Frame-accurate timecodes & rule citations
- Advisory predictions with confidence scores

DELIVERABLES

- **Regional/platform variants:** US Broadcast/FCC, EU privacy-forward, YouTube/AVOD
- **Sidecars:** EDL/OTIO, masks, updated captions, QC report
- **API/webhooks** for pipeline integration

PACKAGES AND PRICING MODEL

PILOT (Free)	PROFESSIONAL	ENTERPRISE
<ul style="list-style-type: none">✓ Up to 2 hours or 2 files✓ Full analysis and acceptance report✓ ROI readout on first-pass acceptance and manual hours saved	<ul style="list-style-type: none">✓ Usage-based per runtime hour✓ All reports and editorial packs✓ Multi-market editorial	<ul style="list-style-type: none">✓ Monthly license with volume tiers✓ Custom SOP and guidance for detection and reports✓ Multi-market editorial, VPC or on-prem, data residency✓ White-label, custom integrations, SLAs, and dedicated support

What we don't do: *We don't provide legal advice or file regulator submissions; we produce policy-aligned reports and edit packs.*

READY TO SHIP GLOBALLY?

Start a two-file pilot and see your agent plan. Run a same-day analysis on one episode. Try a pilot and measure first-pass acceptance.
