

VidComply

Global Distribution Enabler

Global release orchestration for streaming and studios

- AI-Native
- Enterprise-Grade
- Truly Global
- Seamless API & SSO

Our clients:

ANUVU

Ryff

Multi-Format

Video, Trailers, Posters, Art

Multi-Market

Localized globally, compliant

Multi-Channel

Platform-optimized

Our platform vision

Advanced technology built specifically for the unique demands of entertainment content.

Semantic scene understanding

Unique value which we bring is a complex system that not just applying changes, but provide complex semantic analysis and layer extraction from materials

Agentic Workflow

Chained vision and language models orchestrating complex edits and localization workflows automatically

Frame-Accurate Precision

Object removal, inpainting, and motion tracking at scale with professional-grade quality

Compliance & Brand Safety

Designed for regulatory compliance, brand consistency, and seamless team collaboration

Global Content, Local Chaos

The Manual Workflow Crisis

20+ markets, 10+ channels → thousands of asset variants needed

Manual edits for object removals, format adjustments, subtitles, and compliance checks

Weeks of agency coordination → inconsistent brand execution and missed launch windows

Creative teams trapped in repetitive production instead of strategic storytelling

The Hidden Cost

Version_27_final_FINAL.mp4

Endless email threads, spreadsheet tracking, and agency back-and-forth create bottlenecks that delay launches and dilute creative vision.

Streaming Launch Across Markets

See how a single video asset transforms into a complete, launch-ready global package.

- 1 **Input**
Single episode
- 2 **Platform Processing**
 - Generates regional trailers & cutdowns
 - Creates localized posters & thumbnails
 - Applies territory-specific edits & compliance
- 3 **Output**
Launch-ready platform-specific package in hours, not weeks

YouTube

16:9 format, localized titles, region-specific ratings

TikTok & Instagram

9:16 vertical, platform-optimized hooks

CTV

Territory-compliant, broadcast-ready

Built for High-Volume Content Owners

Studios & Streamers

Title launches, episodic content, and franchise marketing at scale

Content Distributors

Always-on across multiple markets and channels

Enterprise Integration

API and UI that plugs seamlessly into your existing DAM, MAM, and cloud infrastructure.

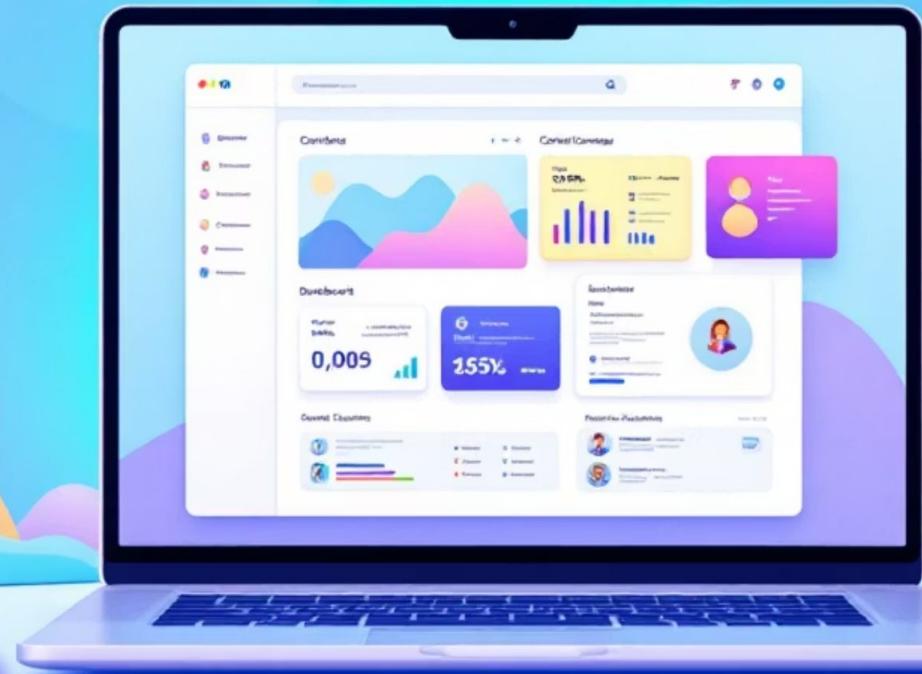

Enterprise-grade controls with roles, approvals, and audit logs

Live Demo Walkthrough

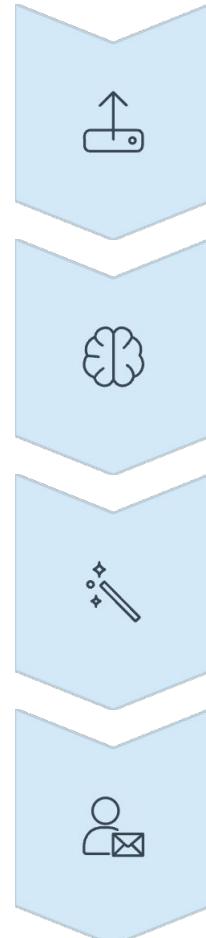

In the next few minutes,
we'll demonstrate the
complete workflow:

Agentic Vision Automates

End-to-End Content Adaptation

An AI-native platform that ingests your hero content and outputs localized, channel-ready assets—automatically, at scale.

Ingest

Upload trailers, masters, and key art assets

Understand

Scene, object, brand & narrative intelligence

Transform

Edit, localize, adapt for each channel

Distribute

Export to your existing tools and partners

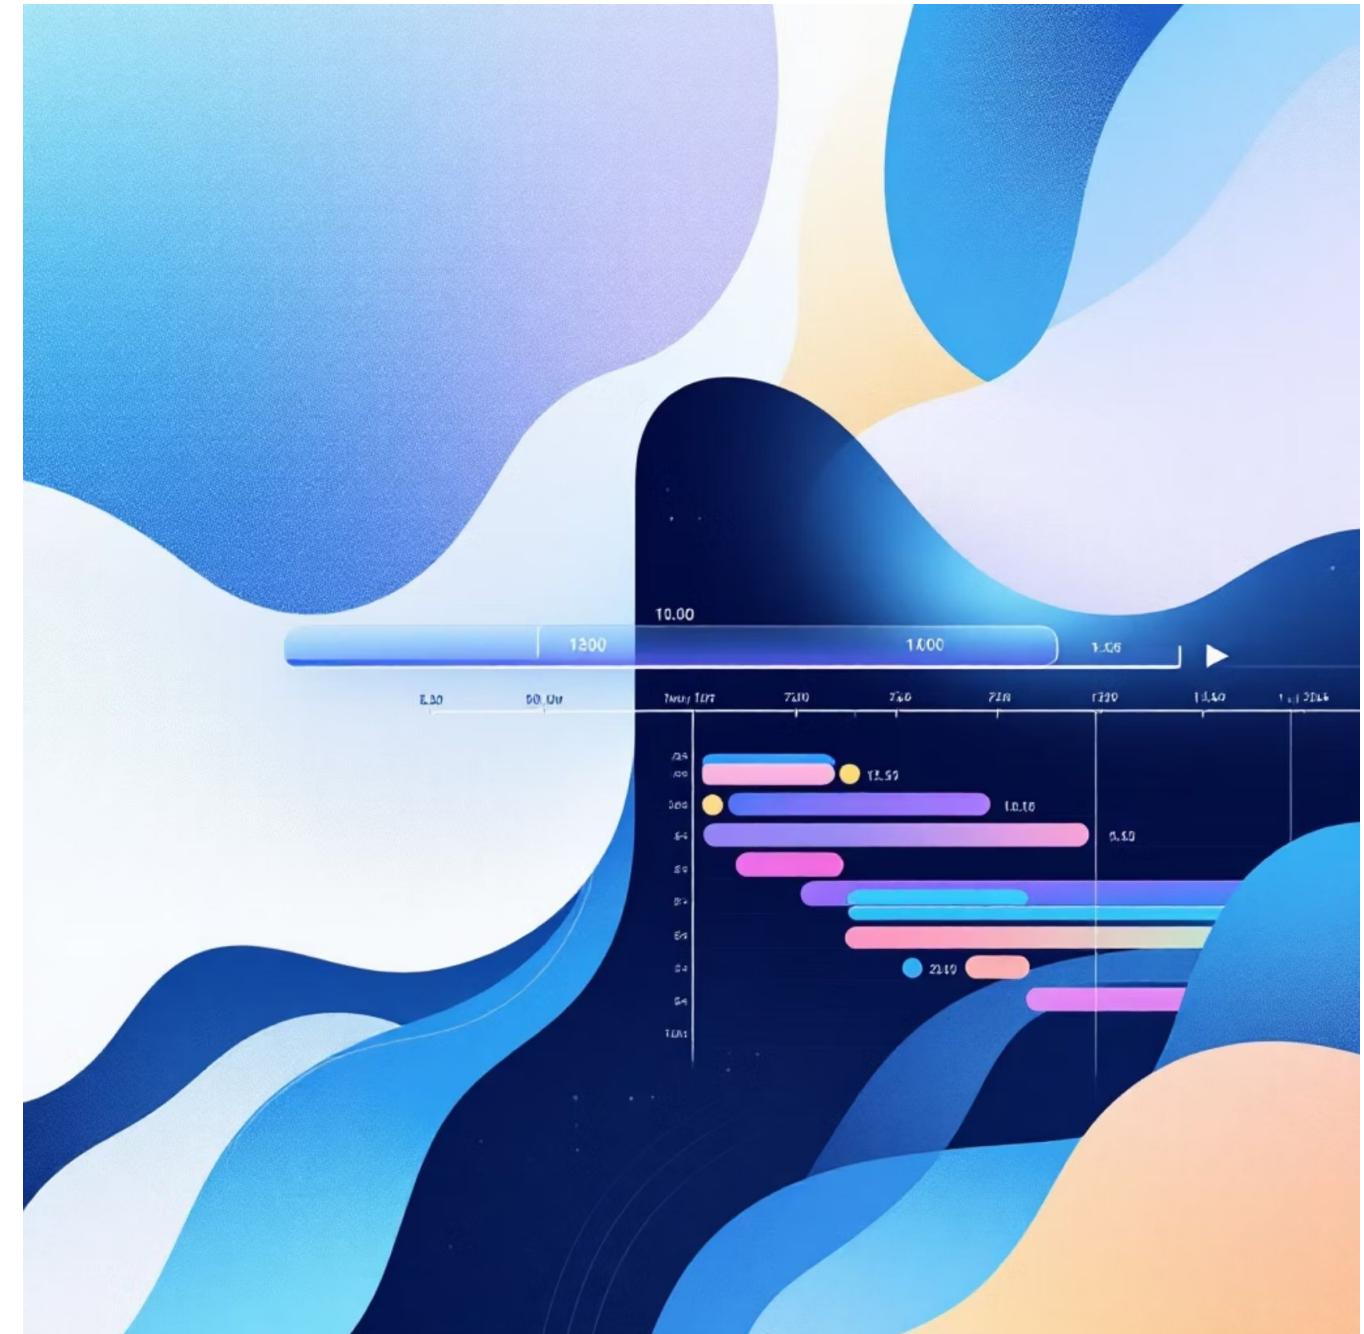

Smart Asset Generation

Intelligent Content Creation

Transform long-form content into compelling trailers and cutdowns automatically. The platform analyzes your footage and selects the most impactful scenes based on your creative brief and target audience demographics.

- AI-powered scene selection and sequencing
- Audience-optimized content recommendations
- Rapid iteration across multiple versions

Why Studios, Streamers & Brands Care

10x

Faster Production

Days reduced to hours

70%

Cost Reduction

vs. manual agencies

Measurable Business Impact

10x faster asset localization and adaptation—transform weeks into hours

Up to 70% cost reduction compared to manual agencies and reshoots

Brand-safe and consistent across all markets and channels with automated compliance

Unlocks incremental revenue through more timely launches in more territories
