# **VIDCOMPLY**

THE COMPLIANCE LAYER FOR AI-GENERATED VIDEO

# From Al Generation to Production-Ready Masters in Hours

Agentic video editing platform that transforms any Al-generated content into globally compliant versions. Works with Sora, Runway, Pika, and all GenAl platforms—no integration needed.

# WHAT IT IS

VIDCOMPLY AI is an **agentic editing and compliance engine** for AI-generated video and training content. It automatically detects compliance issues in content from any GenAI platform (Sora, Runway, Pika, Midjourney video); applies **intelligent edits using AI agents**; then delivers production-ready masters certified for global distribution. From raw AI output to broadcast-quality finals—automated, scalable, and film-grade.

## WHO WE SERVE AND WHY THEY USE IT

# **GenAl platforms & developers**

Make generated content instantly distributable with compliance certification API

# **Training content producers**

Ensure corporate training videos meet compliance requirements across all jurisdictions

## **Brands using Al for content**

Generate once on any platform, get certified versions for every market automatically

## **Content platforms & publishers**

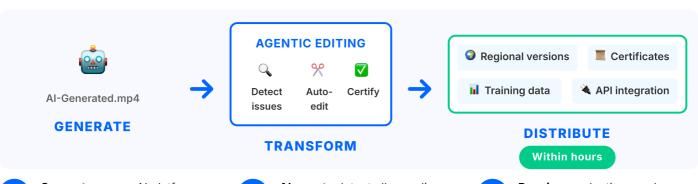

Accept more AI content safely with pre-screening and automated fixes

#### **WHY NOW**

The biggest pain: **infinite regeneration loops**. Find one logo? Regenerate. Face visible? Regenerate. Wrong gesture for a market? Regenerate again—losing everything you liked. **Teams waste days and burn credits trying to get one compliant version**. We fix issues in your existing video—no regeneration needed. Keep what works, fix only what doesn't.

#### **HOW IT WORKS**

- Generate on any Al platform (Sora, Runway, Pika). Upload your best take or connect via API. No platform integration needed.
- Al agents detect all compliance issues, apply intelligent edits (blur, replace, cut), maintain creative intent. Review optional —fully automated available.
- Receive production-ready masters for each region, compliance certificates, and transformation data to train better models.

# VIDCOMPLY

THE COMPLIANCE LAYER FOR AI-GENERATED VIDEO

# **CAPABILITIES BY JOB TO BE DONE**

# Universal GenAl compatibility

- → Works with any Al video platform—Sora, Runway, Pika, Luma, Stability Al, Midjourney—no integration required
- → Handles all formats and resolutions from consumer to 8K professional
- → Process synthetic media, deepfakes, and hybrid Al/real content

## Intelligent agentic editing

- → Al agents automatically remove prohibited content, blur sensitive elements, replace problematic objects
- → Maintain creative intent while ensuring compliance—beer becomes juice, logos vanish seamlessly
- → Film-grade VFX quality using the same tools as Hollywood post-production

#### Multi-market transformation

- → One Al-generated video becomes 15+ regional versions automatically
- → Certified for US Kids, EU GDPR, MENA cultural standards, APAC regulations
- → Platform-specific optimization for YouTube, TikTok, Netflix, broadcast

# Training data generation

- → Every edit creates paired training data (original → compliant) for model improvement
- → Help GenAl platforms learn to generate compliant content from the start
- → Industry-standard compliance dataset for next-generation models

## **Certification & integration**

- → VIDCOMPLY Certificate proves content meets all regional requirements
- → REST API for seamless integration into any workflow or platform
- → "Powered by VIDCOMPLY" badge for trusted distribution

# **What Goes In**

#### **REQUIRED**

- → Al-generated video from any platform (Sora, Runway,
- → Target markets: countries/regions for distribution
- → Distribution platforms: YouTube, TikTok, broadcast,

#### **OPTIONAL**

- → Brand guidelines & prohibited elements
- → Training video compliance requirements
- → API webhook for automated pipeline

# What You Get

#### **COMPLIANT MASTERS**

- → Regional versions: US, EU, MENA, APAC, LatAm
- → Platform-optimized: YouTube-safe, TikTok-ready, broadcast-compliant
- → Training-ready: Corporate compliance verified

# **DOCUMENTATION & DATA**

- → VIDCOMPLY Certificate for each version
- → Transformation data for model training
- → Compliance report with all edits documented

# **PACKAGES AND PRICING MODEL**

#### **STARTER**

- √ 50 Al video analyses
- ✓ Basic auto-editing
- √ 3 regional versions
- ✓ Standard certificate

#### **PRO**

- √ 500 AI videos
- ✓ Advanced agentic editing
- 10 regional versions
- ✓ API access + priority processing

#### **PLATFORM**

- ✓ Unlimited processing
- ✓ Training data access
- ✓ White-label integration
- "Powered by" certification

**GenAl Compliance Report 2024:** We analyzed 10,000 Al-generated videos. 92% had compliance issues, 67% were blocked on major platforms, resulting in \$2.3M average lost revenue per brand.

# GENERATE ANYWHERE. COMPLY WITH US.

Transform any Al-generated content into production-ready masters. Try with your Runway or Sora videos today.
