

VidComply

The Orchestration Layer for the \$15B Media Supply Chain

LONDON, MAY 2026

The \$15B Global Media Release Bottleneck

- Single season needs 50+ trailers & posters, 20+ languages, cultural compliance adaptations, platform tweaks, QC and rating reports
- Fragmented tools, agencies, spreadsheets slow ops and manual rework
- AI generators explode assets but add compliance and monetization risks
- No holistic view or unified graph for team

THOUSANDS OF HOURS OF CONTENT

Vidcomply: AI Orchestration Layer for TV & Film

UNIT ECONOMICS PER SINGLE TV SHOW

TIME TO REVENUE

~~14+ Days~~

24 Hours

VENDORS COST

~~\$140.000+~~

90% Cost Reduction

OPERATIONAL COMPLEXITY

~~11 Vendors~~

1 Platform

- **Single Orchestration Layer**

Consolidated post-production fulfillment. All audio, video, remediation and global release flows managed via a single platform.

- **Domain & Language Agnostic**

Native scalability for global release. The orchestration logic adapts to any regional requirements or platforms specs without re-engineering.

- **Full Operator Control**

We shift global media distribution from a slow black box service to an instant self-service infrastructure.

The \$15B Efficiency Gap in Global Media

- Targeting the exact 10% of the \$150B+ Total Content Spend (2025) across Streaming, TV, and Film wasted on manual logistics.
- We strictly target the exact 10% of post-production budgets wasted on non-creative operational friction

Market Size

Unlocking \$100M ARR

- The media supply chain is massively fragmented, with conservatively 15,000+ vendor hubs globally
- The UK Screen Alliance reports 3,400+ registered post-production enterprises in the UK alone, before factoring in Hollywood, India, and the Asia.

Annual License Fee

\$70k - \$180k

The Target

800 Enterprise Hubs

The Market Capture

Just 5% of Global
Vendors

Autonomous Media Release Infrastructure

VidComply replaces fragmented vendor workflows with a single, parallel execution layer. We automate the technical logistics so human experts can focus on the creative tasks.

Validated by Global Media Leaders

Secured Revenue

- Signed \$336k (2+1 year) contract for automated In-Flight Entertainment content compliance with Anuvu (\$580M+ Rev).
- **Press release: Anuvu Signs Exclusive Agreement with VidComply**

Tier-1 Pilots

- CJ ENM (\$3.6B+ Giant): Active Audio & VFX Post-Production pilot (\$15,000 pre-payment secured).
- Prime Video: Active Marketing Variations pilot.
- Juventus FC: Pilot for Sponsor variations.

GTM & Enterprise Moats

- Patent GB2607109.2 filed
- Official Nvidia Inception partner
- Official AVID Partner
- AWS Marketplace Onboarding

Competitive Landscape

In March 2026, Netflix acquired Ben Affleck’s AI startup, InterPositive, for up to \$600M, the only other end-to-end player. We are the deployment infrastructure for the rest of the market.

Vladislav Isaev
CEO & Tech Founder

- 10+ years deploying enterprise AI architectures in Media, with a previous \$2.5M bootstrapped AI exit and 3 patents filed.
- Prime Video Inventor Award recipient and Top 5% Performer who directly shaped the platform's technical landscape, invented first Prime Video GenAI solution and presented it Prime Video CEO.

Steven Cox
Strategic Advisor & Partner

- Ex-Amazon Product Leader who scaled and ran Prime Video Compliance & Virtual Product Placement (VPP) organizations.
- Former CEO of Ryff (GenAI AdTech) holding 5+ US Patents, with 20+ years of leadership across Microsoft, eBay, and Staples (MIT Sloan).

Stanislav Stolpovskiy
Technical Advisor

- Head of Search/ML Practice at Grid Dynamics who architected the deep-learning systems that directly drove their NYSE IPO.
- 14+ years engineering elite ML pipelines, actively partnering with Google's core technical teams to define industry-standard architecture.

Core Operations & Engineering Team

- APAC VP of Sales + SDE + Audio Engineer

Seed Round: £2.5M (\$3.3M)

The Ask: Raising £2.5M for 18-24 months of runway to scale our deployment engine, convert active Tier-1 pilots into recurring revenue, and drive pipeline to **£1M+ ARR**.

Use of Funds:

Engineering & Product (7 FTEs)

Hire 7 FTEs to scale the core agentic infrastructure and complete enterprise integrations

Go-To-Market & Sales (2 AEs)

Hire 2 Enterprise AEs (US & APAC) and fractional marketing.

Target Milestones:

- Recurring revenue: Convert active Tier-1 pilots (CJ ENM, Prime Video) into locked recurring revenue contracts.
- Enterprise integrations: Complete native integration with AWS, Adobe, and Avid to utilize their co-selling capabilities.
- Expansion: Aggressively capture the high-volume FAST channel and global distributor markets.

Vladislav Isaev, Tech Founder & CEO

GTM Expansion Timeline

The Media Intelligence Graph

- **The Intelligence Graph:** every new file we process teaches the system the unwritten rules of Netflix, Prime Video, CJ ENM for global releases. This continuous learning allows us to automate the entire supply chain end-to-end for instant global distribution..
- **Native Integration:** We do not force operators to learn new software. Our engine runs headlessly in the cloud, performing the multi-signal analysis and feeding the corrected data directly back into the industry's existing tools (Adobe, Avid, AWS).

VidComply Dynamic Compliance Cloud

- Adaptive Temporal Sampling: our engine ignores noise and only processes semantic scene changes, reducing data volume and cost by 90% while maintaining frame-accurate precision.
- Context-Aware Reasoning: we move beyond keywords to detect intent and social interaction distinguishing between a friendly hand on a shoulder and prohibited behavior
- Global Policy Mapping: instantly switch between regional compliance regimes (e.g., UK vs. Middle East) with a single profile toggle and zero model retraining
- Press release: Anuvu Signs Exclusive Agreement with VidComply
- Filed Patent: GB2607109.2

The screenshot displays the VidComply Compliance Cloud interface. The top navigation bar includes the VidComply logo, the title 'The Night Manager S2E6', and metadata: 'Uploaded 2/21/2020 • Duration: 01:01 • Project: Demo'. It also shows '44 Issues' and a '01:01' duration. The main content area is divided into tabs: 'Compliance' (1), 'Content Issues' (44), and 'Transcript' (0). Below the tabs are filters for 'All', 'Strong', 'Mild', 'Info', 'Video Only', and 'Audio Only', along with a '+ Add' button and a 'All Categories' dropdown. The central list shows several detected issues with timestamps, descriptions, severity levels, and associated AV categories.

Timestamp	Description	Severity	AV Category
00:30:55	Statue of a robed, bearded prophet-like figure visible behind the seated man, clear religious depiction.	STRONG	AV1: Islam & (prophet)
00:31:21	Woman seated in a low-cut knit top showing noticeable cleavage; non-explicit but sexually suggestive framing.	MILD	AV18: Modesty (cleavage)
00:31:48	Religious statue of a prophet-like figure visible behind the seated man (depiction of a prophet/angel in frame).	INFO	AV1: Islam & (statue)
00:34:55	Hand holding/caressing back of man's neck/head in a close, likely intimate/ sensual manner; suggests physical intimacy.	MILD	AV8: Intimacy (touching)
00:35:12	Male hand on another man's cheek/neck in an intimate posture; plausible same-sex affectionate contact, single-frame needs temporal verification.	INFO	AV7: LGBTQ (Visual) (cheektouch)
00:35:24	Two men in close face-to-face contact; one has a hand on the other's neck/shoulder, suggesting possible same-sex affectionate/romantic contact.	INFO	AV7: LGBTQ (Visual) (affection)
00:35:32	Two men in close forehead-to-forehead contact with a hand on the neck — possible same-sex affectionate interaction (needs temporal verification).	INFO	AV7: LGBTQ (Visual) (same-sex)
00:37:29	Two men facing each other with hands on shoulders in a close embrace, showing same-sex affectionate contact.	MILD	AV7: LGBTQ (Visual) (embrace)

On the right side of the interface, there is a video player showing a scene from 'The Night Manager'. Below the player, the 'CURRENT ISSUE' section highlights the issue at 00:31:48. The 'SEVERITY ANALYSIS' section provides an 'Informational flag for content classification. Shot 526, Frame 45813.' The 'CATEGORIES' section lists 'AV1: Islam & Arab Sensitivities (Visual) (statue)'.

Vidcomply Agentic Audio Mixing

- **Agentic Orchestration:** Orchestrates model-agnostic STT/Diarization via proprietary environment classification (trained on custom media datasets).
- **Adaptive Multi-Track Mixing:** Dynamic blending that adapts to scene-level acoustics rather than using hardcoded averages.
- **Deterministic Compliance:** Intelligent LKFS/True-Peak normalization with predictive clipping prevention to preserve creative dynamic range.
- **Pipeline Conformity:** Native bi-directional AAF support (AAR2) converts gain envelopes directly into Avid Pro Tools automation.

Model-Agnostic Infrastructure: Owning the Orchestration

- **Agnostic Agent Orchestration:** Much like Amazon Logistics orchestrates delivery regardless of the specific vehicle, VidComply is model-agnostic. We can instantly swap underlying LLMs or VLMs to utilize the best-in-class tool for specific task by fine-tuning on our proprietary dataset.
- **The Intelligence Graph Advantage:** Every piece of processed data pushes the system further, training our Intelligence Graph on the unwritten delivery rules of global broadcasters.

\$50M Movie Production Breakdown

\$40M Content Creation + \$10M Post-Production

■ VidComply: YES
■ VidComply: NO

Phase 1: The Creative Core

Budget: \$5M (50% of Post)

- Offline Editorial (Story / Picture Lock) NO
- Creative VFX (CGI, Explosions, Monsters) NO
- Creative Sound (Scoring, Foley) NO
- Color Grading (Cinematic Look / DI) NO

Phase 2: The Execution Layer

Budget: \$5M (50% of Post)

- VFX Cleanup & Visual Compliance (\$1.0M | 10%)
 - Camera, Boom Mic & Crew Removal (CJ ENM) YES
 - Regional Censorship (Blurring logos/alcohol) YES
- Audio Normalization & Localization Prep (\$1.5M | 15%)
 - LKFS / True-Peak Broadcast Leveling YES
 - M&E (Music & Effects) Track Separation YES
 - Foreign Voice Actor Recording (Dubbing) NO
- Mastering & Interoperable Formatting (\$1.0M | 10%)
 - Automated XML, EDL, and IMF Packaging YES
 - Platform-Specific Wrappers (Apple/Amazon) YES
- Marketing Variations, Trailers & Campaigns (\$0.5M | 5%)
 - AI Saliency Tracking (16:9 to 9:16 vertical) YES
 - Automated/Personalized Trailer Assembly (Patented) YES
 - Campaign Generation Tooling YES
- Quality Control (QC) & Final Delivery (\$1.0M | 10%)
 - Deterministic Software Compliance Checks YES
 - Manual "Stare-and-Compare" Human QC NO

Global Release & Monetization

The Economic Shift: Infinite Creation, Bottlenecked Distribution

- The GenAI shift is scaling content creation exponentially, but premium content still requires manual QA, localization, compliance and marketing before release.
- Today, every video is global by default, even mid-tier creators and FAST channels must now pass these premium compliance bottlenecks to monetize their content.
- As total content volume explodes, our automated throughput and revenue scales directly alongside.

Cost of content creation

Annual hours of content created

The \$15B Efficiency Gap in Global Media

The TAM (\$15 Billion)

We strictly target the exact 50% of post-production budgets wasted on non-creative operational friction. While GenAI commoditizes the creative process and explodes content volume, this \$15B execution layer remains 100% manual.
